

Me + open GIS data

Heldev 3.5.18

Topi Tjukanov

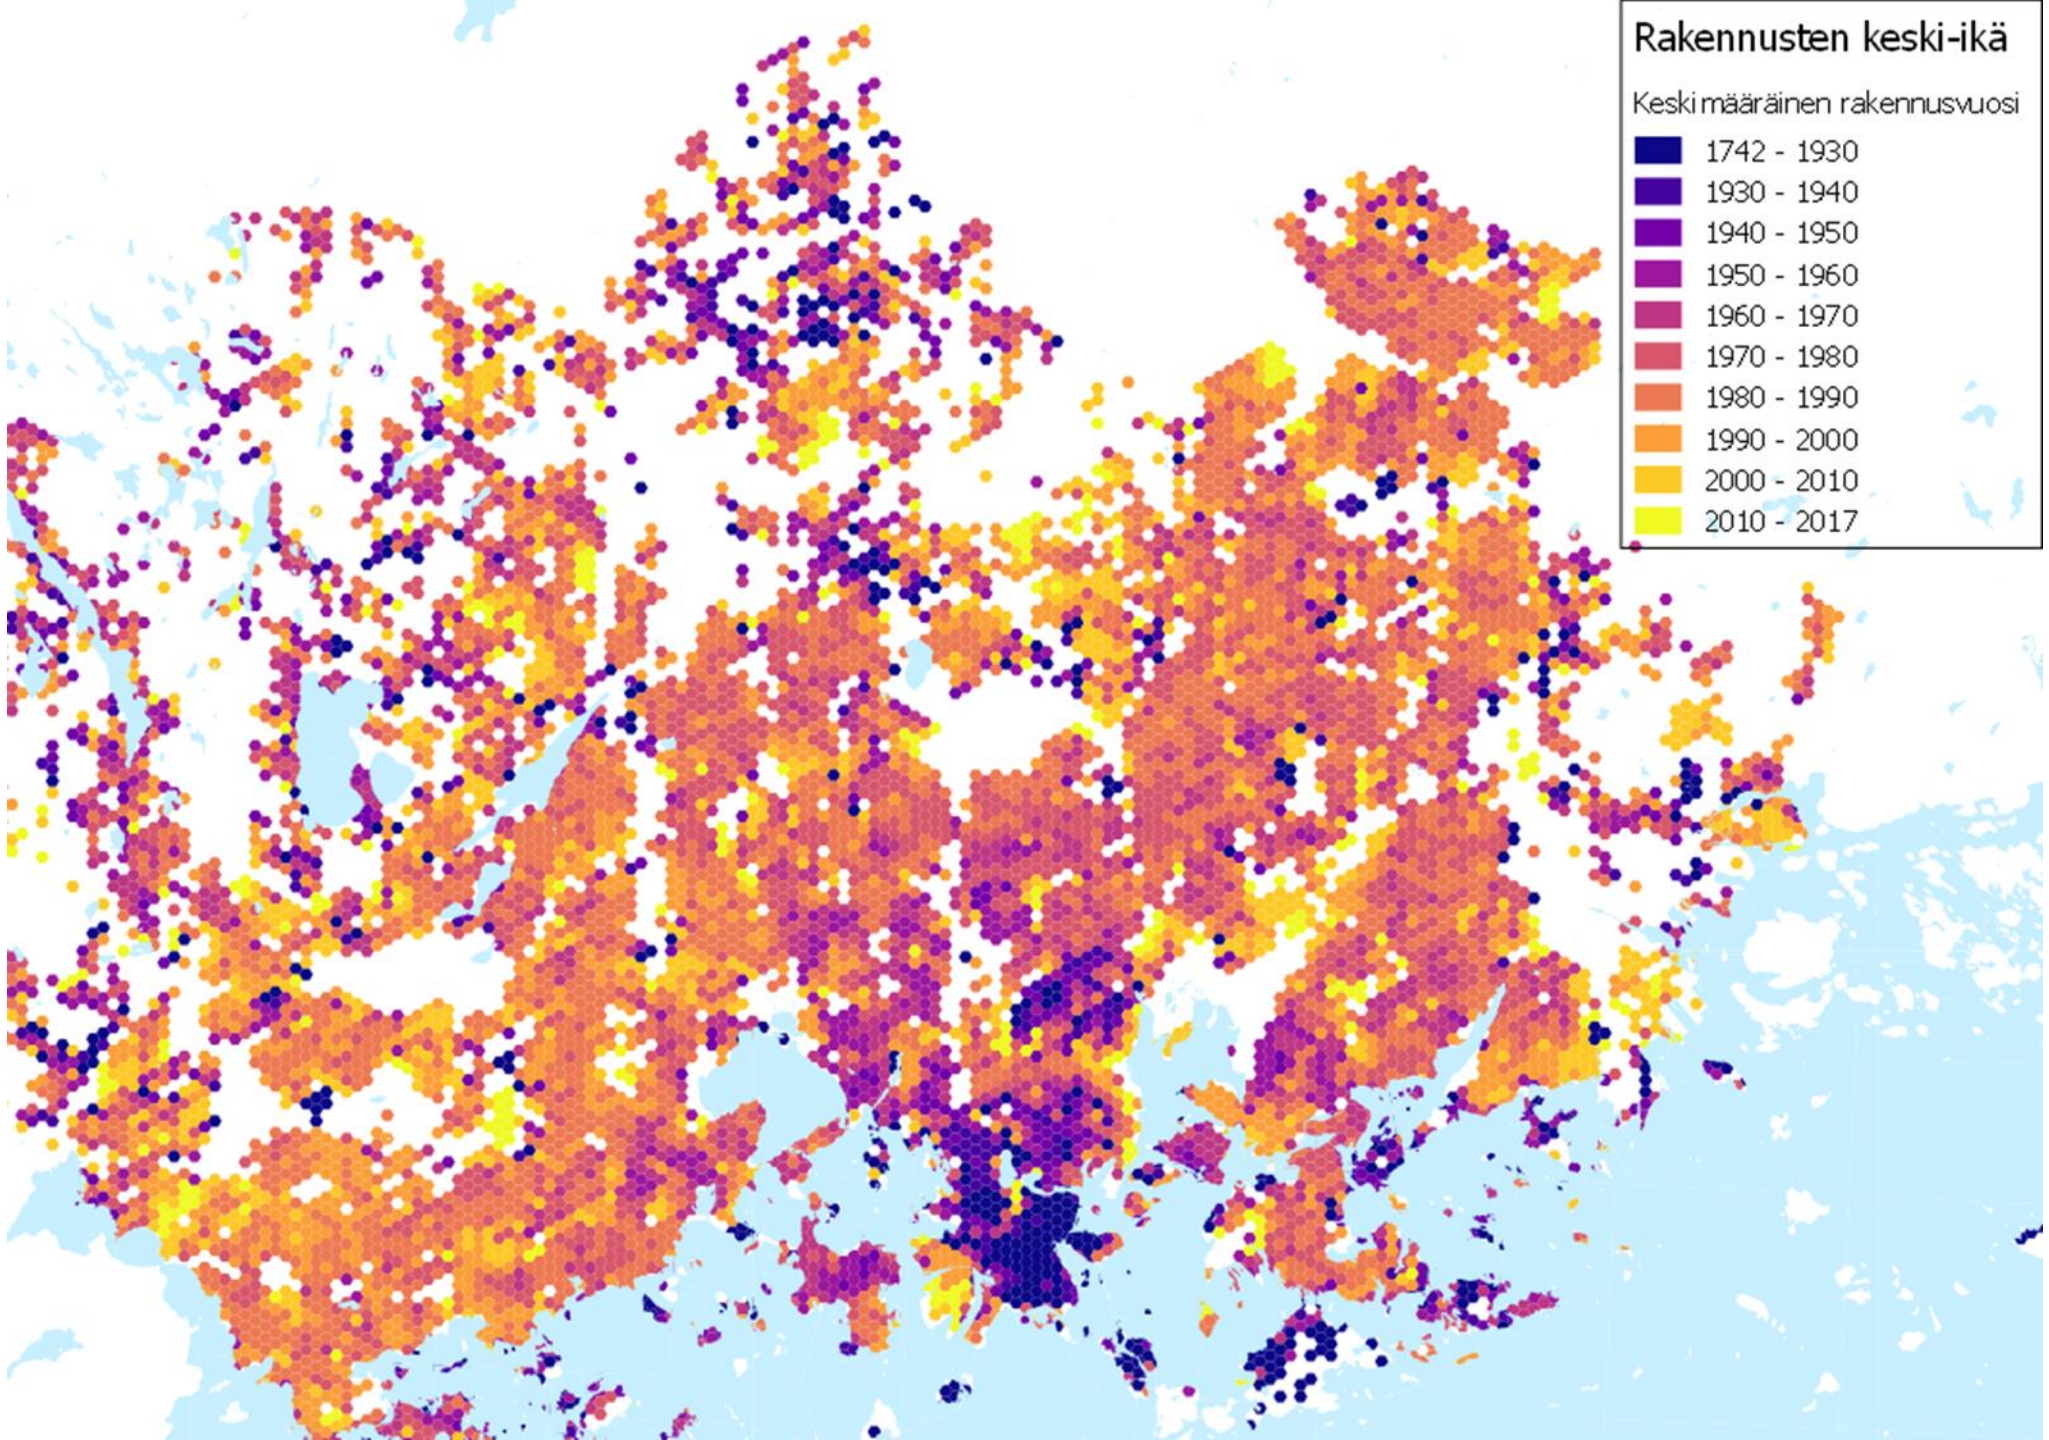

Topi Tjukanov {[@tjukanov](#)}

- Bureaucrat by day, data visualization freelancer by night
- Interested in finding new ways to visualize spatial data
- Background in geography (M.Sc), business (BBA), urban planning and IT
- Portfolio: tjukanov.org

Rakennusten keski-ikä

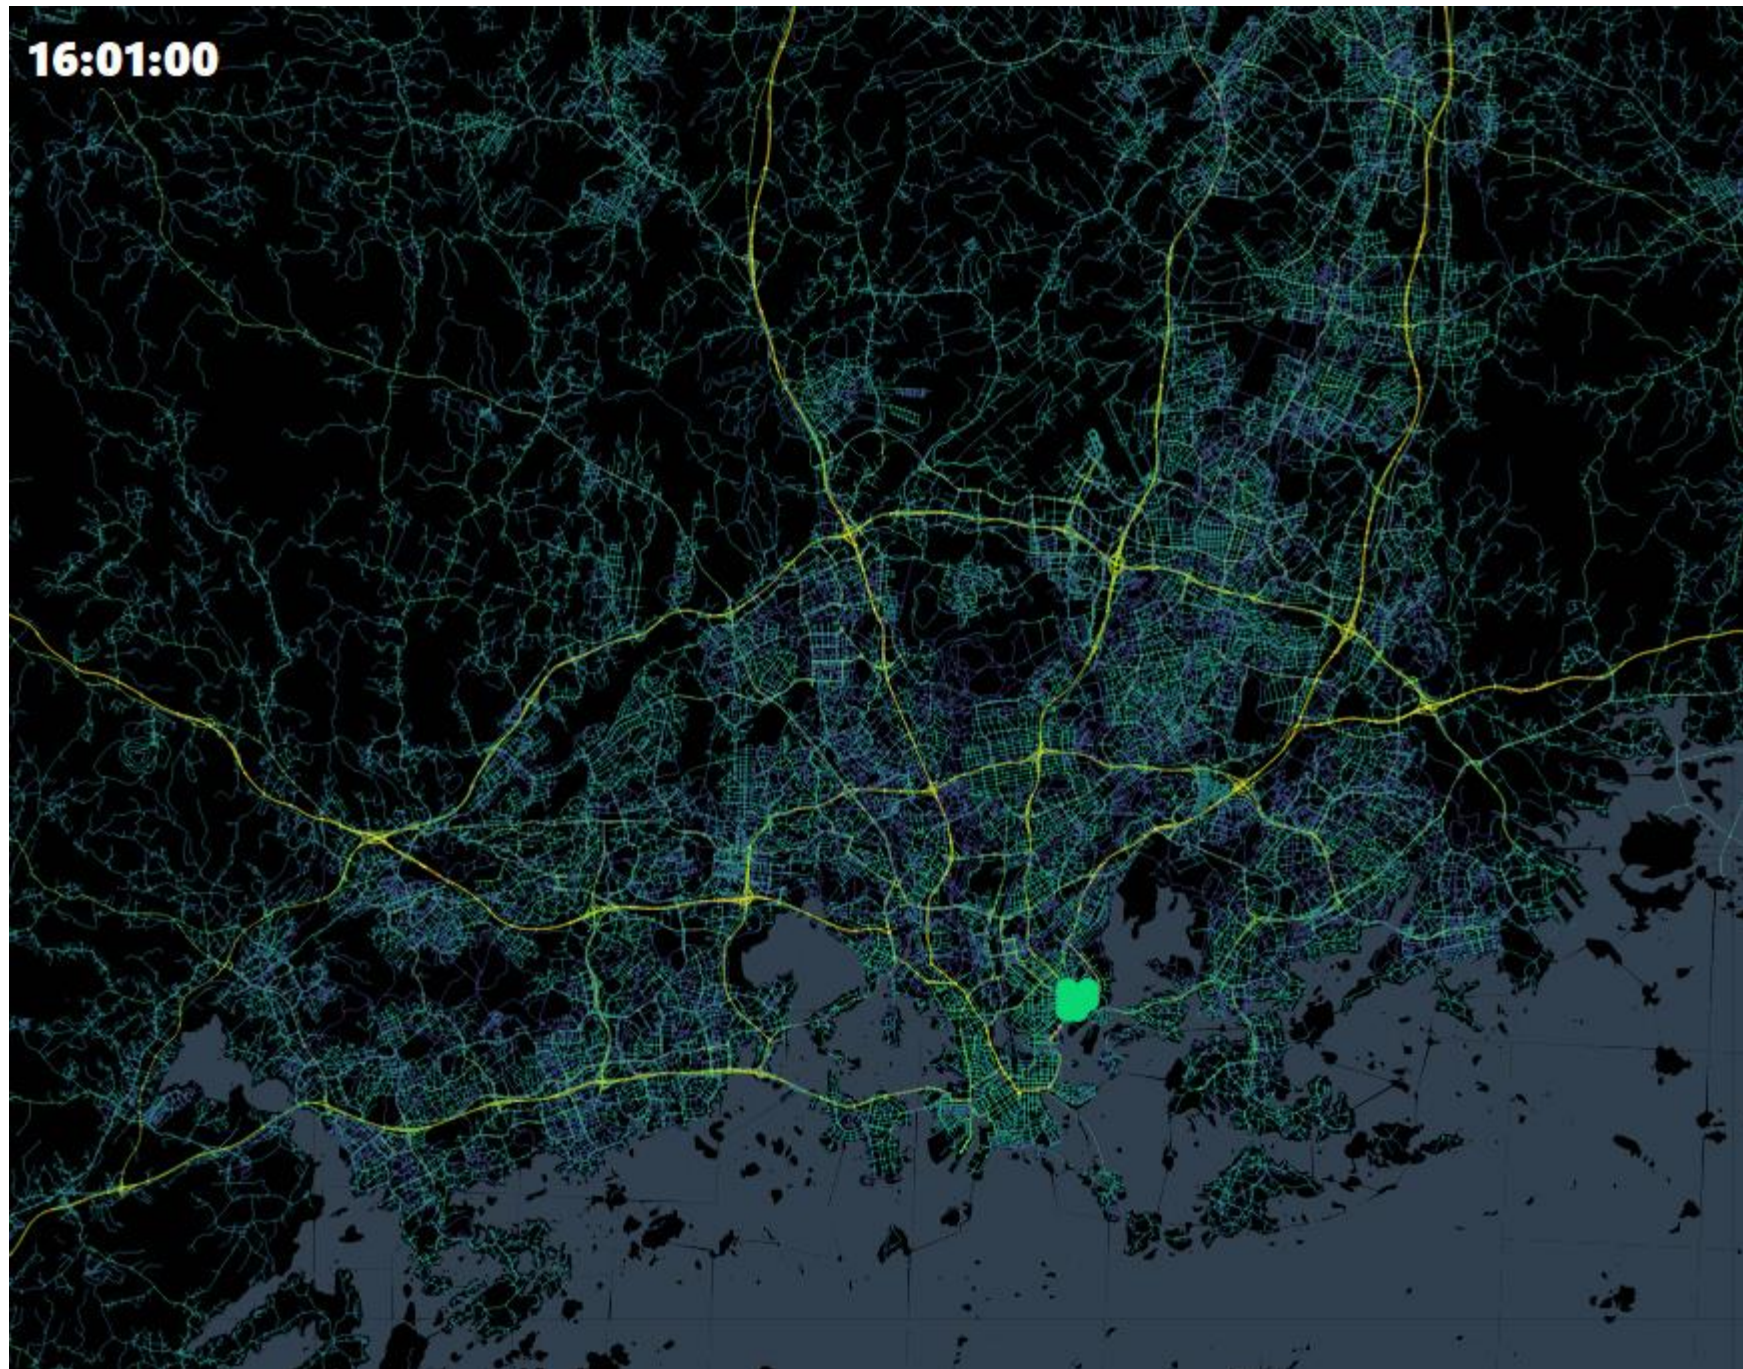

Keskimääräinen rakennusvuosi

- 1742 - 1930
- 1930 - 1940
- 1940 - 1950
- 1950 - 1960
- 1960 - 1970
- 1970 - 1980
- 1980 - 1990
- 1990 - 2000
- 2000 - 2010
- 2010 - 2017

Me + open data

- If data is the new oil, I aim to be a box of matches
- Tinkering with open (geospatial) data is firstly a hobby for me, secondly freelancing work
- There are numerous unexplored datasets already opened
- Basic coding skills have enabled working with API's

My 6 points for data owners

1. Take a wider perspective on formats and ways of opening data
2. Sort out your metadata and documentation
3. Be consistent
4. Think how users could improve your data
5. AI & ML need more data and bigger datasets
6. Be realistic with your expectations

Datasets I'd like to see open

- Helsinki bikeshare data!!!
- Large trajectory datasets
- Tortoise data
- Mobile location data from operators
- All the data!

NYC Citi Bike trips 00:00:00

12:00

Thank you!
