# **Preface**

This publication is an abridged version of *Helsingin ulkomaalaisväestö vuonna 2009*, a Finnish-language statistical compilation about the foreign nationals and people with a foreign background who live in Helsinki. It presents a range of statistics on this population: numbers, employment, housing and education. These statistics are chiefly based on data supplied by Statistics Finland, the Finnish National Statistical Service. Explanations of some terms and definitions of regions are found at the end of the publication. Publication is translated by Magnus Gräsbeck and Roger Munn.

Helsinki, January 2010

Leila Lankinen Information Manager

## 1. Foreign nationals in Helsinki: number and nationality

At the turn of year 2008/2009, there were 38,654 foreign nationals residing in Helsinki, making up 6.7 per cent of the city's population. However, 58,405, i.e. 10.1 per cent, of Helsinki residents had a foreign background. The largest groups of these are Russians and Estonians.

The number of foreigners has been growing rapidly in Helsinki since the early 1990s for a number of reasons. Then, the largest group consisted of citizens of the former Soviet Union, mostly Ingrians, who had been granted the status of returning emigrants in 1990 and who subsequently, moved to Finland in their thousands. At that time, considerable number of refugees also arrived from Somalia, and in 1993 and 1994, many people from the former Yugoslavia found refuge in Finland.

Figure 1. Residents with a foreign background in Helsinki 2009

Figure 2. Proportion of foreign nationals in the population of Helsinki, the Helsinki Region and Finland, 1990–2008

Source: Statistics Finland

The growing number of foreigners in Finland is also a consequence of internationalisation, accelerated by Finland's EU membership in 1995. After rapid growth in the early 1990s, the number of foreigners arriving in Helsinki, its urban region (*i.e The Helsinki Region*) and in Finland generally has slowed. This slowdown is in part accounted for an increase in the number of foreigners receiving Finnish citizenship.

Foreign nationals in Helsinki represent around 160 nationalities, the largest group being the Estonians, totalling 6,578. The second largest group is the Russians, followed by the Somalis.

36.7 per cent of foreigners are from EU countries, 18.6 per cent from other parts of Europe, 14.1 per cent from Africa, 23 per cent from Asia and 2.7 per cent from North America and 2.3 per cent from South America and Caribbean.

#### 2. Mother tongues of foreign nationals and those of the broader population

Of Helsinki's entire population, nearly 10 per cent, i.e 56,321 people, have a foreign mother tongue, the most widely spoken of which is Russian: 12,470 native speakers. The next two largest groups are Estonian and Somali speakers. They are roughly equal in number and together total about 12,000 people. These three groups together account for almost 44 per cent of all foreign language native speakers.

Among the various groups of foreign nationals, Russian is the most common language, spoken as a mother tongue almost by one-fifth. Estonian native speakers are clearly the second largest group, and English native speakers rank third. More than four per cent of foreign nationals are native speakers of Finnish. The majority of these are citizens of countries that for many years received many Finnish immigrants, such as Sweden, the USA, Australia and the former Soviet Union. In addition, Ingrians and their descendants who moved to Finland from the former Soviet Union, more precisely from north-west Russia and Estonia, have raised the number of native speakers of Finnish among the foreign nationals.

Table 2. Foreign nationals and the whole population by mother tongue in Helsinki at the turn of year 2008/2009

# 3. Migration to or from Helsinki among foreign nationals groups

#### Foreign migration between Helsinki and foreign countries

Characteristic of the migration of those foreign nationals residing in Helsinki is the combination of a strong inflow from abroad and a brisk migration between various parts of Finland. In 2008, 7,538 people moved to Helsinki from overseas. Of these, 72.4 per cent were foreign nationals.

Emigration figures tend to fluctuate more considerably over the years than do immigration figures. For example, emigration figures for foreign nationals are particularly high during Finnish public election years, when the Population Register is updated, and in turn otherwise unreported emigration is recorded. Of the 4,083 people moving abroad from Helsinki in 2008, 45.3 per cent, were foreign nationals, which is 14.7 percentage points more than a year before. The strong growth of the proportion is a result from the Population Register updating.

Figure 4. Immigration, emigration and net migration of foreign nationals between Helsinki and foreign countries, 1993–2008

Source: Statistics Finland

Of those foreign nationals moving to Helsinki from abroad in 2008, 38.9 per cent came from another EU country and 13.6 per cent from the rest of Europe. Immigrants from Central and Western Asia accounted for 17.0 per cent, Africa for 11.8 per cent and Southeast and East Asia for 10.9 per cent. Age structures of immigrating foreign nationals include 13.5 per cent 0–15 year olds, 48.9 per cent 16–29 year olds, and 29.2 per cent 30–44 year olds.

Foreigners moved abroad from Helsinki in 2008, 34.1 per cent moved to another EU country, 6.1 per cent went elsewhere in Europe and 7.4 per cent to North America. Emigration to Asia was also frequent, with 3.8 per cent moving to Southeast or East Asia and 4.0 per cent to Central or Western Asia. Age structures among foreign emigrants were 8.8 per cent 0–15 year olds, 45.9 per cent 30–44 year olds, roughly 28 per cent 16–29 year olds, and 15.9 per cent 45–64 year olds. The numbers of over 65 year old foreign nationals both immigrating and emigrating have been small.

#### Foreign migration between Helsinki and the rest of Finland

Migration of foreign nationals between Helsinki and the rest of Finland is common in both directions. Between 1993 and 2008, a total of 23,477 foreign nationals moved from other parts of the country to Helsinki, and 19,861 moved in the opposite direction. In 2008, movers-in and movers-out were roughly equal in number.

Among foreign nationals moving to Helsinki from other parts of Finland in 2008, 30.6 per cent were Asian nationals. EU nationals accounted for 26 per cent and Africans for 20.6 per cent. Russians and Estonians both made up 14.4 per cent. These migrants had a young age structure, with over half being 16–29 year olds and almost one-third 30–44 year olds. Under 15 year olds accounted for 9.5 per cent.

Among those foreign nationals moving away from Helsinki to other parts of Finland that same year, almost 30 per cent consisted of EU nationals, and almost half were Europeans (either EU or non-EU nationals). Asians accounted for almost 30 per cent of this migration, Estonians for 15.9 per cent, Russians for 12.6 per cent and Africans accounted for more than 17 per cent. Like their counterparts moving from elsewhere in Finland into Helsinki, those foreign nationals moving in the opposite direction were predominantly young: almost half were between 16 and 29 years. The proportion of under 15 year olds was, however, only 8.9 per cent.

#### 4. Age structure

Those with a foreign mother tongue in Helsinki have a younger age structure than Helsinki residents overall. Among those with a foreign mother, the younger age groups, i.e. young adults and children, are the largest: 17.8 per cent are under 15 years old (13.7 per cent of all Helsinki citizens). And whereas over 65 year olds make up 14.3 per cent of Helsinki's entire population, their proportion of those with a foreign mother tongue is only 3.3 per cent.

The proportion of working-age residents (15–64 year olds) in Helsinki is 78.9 per cent among those with a foreign mother tongue, and 72 per cent among the population at large. Similarly, those with a foreign mother tongue also have a clearly greater proportion of young people of working age. 25–39 year olds account for 35.4 per cent of those with a foreign mother as against 24.8 per cent of the city's entire population. Foreign speakers have a smaller proportion of working-age people in the older bracket: 50–64 year olds make up 11.5 per cent of foreign speakers compared with 19.6 per cent of the entire population.

Age groups 95+ Women Men 90-94 85-89 80-84 75-79 70-74 65-69 60-64 55-59 50-54 45-49 40-44 35-39 30-34 25-29 20-24 15-19 10-14 5-9 15 10 10 15 % ■Foreign mother tongue ■Whole population

Figure 6. Age structure of the whole population and those with a foreign mother tongue at the turn of year 2008/2009

Source: Statistics Finland

# 5. Families and nativity

At the turn of year 2008/2009, 36.1 per cent of those with a foreign mother tongue were registered as married. Of all marriages in Helsinki in 2008, 20,2 per cent involved at least one foreign national.

In 2009, there were 13,802 families in Helsinki in which at least one of the spouses was a foreign national, and those families typically had more children. Thus, in the same year, while Helsinki families in general had on average 0.82 children, foreign national families had 0.99 child.

Also, the proportion of childless families among, foreign national families is smaller. Of families with two foreign national adults, 45.9 per cent were childless, and the amount of the group has been increasing in the last couple of years. The proportion of big families is greater among foreign national families, nearly 8 per cent of which have at least three children under 18 – versus 5.1 per cent among all families.

In 2008, there were 41.9 children born in Helsinki per one thousand women aged 15–49 years. For those with a foreign mother tongue, the fertility rate of the same age group was higher. And mothers with a foreign mother tongue also bear their children at an earlier age, on average, than mothers in the overall population. Nativity varies depending on nationality

Figure 7. Total fertility in the Helsinki Metropolitan Area in various language groups in 2000–2008

Source: Statistics Finland

### 6. Housing

Rented housing is much more common among foreign nationals than other Helsinki residents. At the turn of year 2006/2007, 76,8 per cent of households with a foreign mother tongue lived in a rented home, compared with 45,4 per cent of households with a domestic mother tongue, Finnish or Swedish.

Moreover among tenants, those with a foreign mother tongue more commonly lived in flats built with state subsidies (71.8 per cent) than those with a domestic mother tongue did (50.8 per cent).

In owner-occupied housing at the turn of the year 2006/2007, the percentage of people living in an owner-occupied dwelling was clearly lower (18.2) among residents with a foreign mother than among Finnish or Swedish native speakers (50.3).

Figure 8. Households with a foreign mother tongue and those with a domestic mother tongue by tenure status in Helsinki at the turn of year2006/2007

Source: Statistics Finland

At the turn of the year 2006/2007, crowded housing was more common among those with a foreign mother tongue (23.9 per cent) than those with a domestic mother tongue (8.8 per cent). According to Norm 4, (Statistics Finland) crowded housing includes those households with more than one person per room, when the kitchen is not reckoned as a room. In households with a foreign mother tongue, each person had an average space of 27.3 square metres, versus 34.6 sq.m. in households overall.

Figure 9.Percentage of crowdedly-housed foreign- and domestic-language households of all households in Helsinki at the turn of 2006/2007

Source: Statistics Finland

# 7. Employment and unemployment

At the turn of year 2006/2007, the employment rate among people with a foreign background in Helsinki was 50.3 per cent. The number of persons with a foreign background in the labour force was 26,041 people.

At the same time, the unemployment rate among people with a foreign background in Helsinki was 19.2 per cent. The number of unemployed persons in Helsinki is 4,990, which is quarter of all foreign-background jobless in Finland. The employment situation varies strongly with nationality.

Table 3. People with a foreign background by main occupation at the turn of year 2006/2007

	Helsinki	Helsinki	Helsinki	Finland
		Metropolitan	Region	
		Area		
Labour force	26 041	43 189	47 784	104 607
Employed	21 051	35 153	39 149	84 266
Unemployed	4 990	8 036	8 635	20 341
Employment rate (15-64 year olds), %	50,3	52,4	53,1	52,1
Unemployment rate, %	19,2	18,6	18,1	19,4

Source: Statistics Finland

According to Statistics Finland's data for the turn of year 2006/2007, immigrants coming from other EU countries and Nordic countries had been the most successful at finding a job; African immigrants and those from the Middle East had been least successful. Among people with a foreign background, women's unemployment rate was 21.1 per cent and men's 17.6.

More generally, long-term unemployment is especially prevalent among elderly and poorly educated immigrants having a refugee background. On the other hand, even an extensive education does not necessarily guarantee work for people with a foreign background in the way it does others.

Regardless of education, those people of working age whose first language is neither Finnish nor Swedish are more likely to be unemployed. At the turn of year 2007/2008, 27 per cent of foreign-background 20–64 year olds with a high-level education were out of work force.

At the turn of year 2006/2007, 26 per cent of foreign-background Helsinki residents worked in the public or social services sectors, particularly in health and welfare provision. Also more than a quarter of foreign-background residents worked in business services and 24 per cent worked in the retail trade, or hotels and restaurants.

## 8. Educational background and level of education

At the end of 2007, the proportion of 15-year-old or older foreign-language Helsinki residents having a secondary or higher degree was 41 per cent. 8 per cent had a secondary general education and 13 a secondary vocational education. 20 per cent had tertiary education.

In 2007, secondary general education schools in Helsinki had 1,252 students with a foreign (i.e. other than Finnish or Swedish) mother tongue; in other words 7.4 per cent of all students at this level. Secondary vocational education establishments had 2,214 such students, that is 10 per cent of students in this category.

At tertiary level vocational training in Helsinki, the 1,610 polytechnic students with a foreign mother tongue made up 7.9 per cent of students in their category.

In 2007, universities in Helsinki had a total of 2,402 students with a foreign mother tongue, i.e. 5,1 per cent of all university students.

Figure 10. Proportion of students with a foreign mother tongue (other than Finnish or Swedish) in degreeoriented education in 2007

Source: Statistics Finland

The most common language other than Finnish or Swedish is Russian both in secondary and tertiary education. At secondary level, the second most common language is Estonian, but at tertiary level, Chinese and English are more common than Estonian.

In 2007, the universities of the Helsinki Metropolitan Area had a total of 2,748 foreign students studying for a degree, 945 of whom were postgraduates. These foreign students made up 5 per cent of all university students in the Helsinki Metropolitan Area. 52 per cent of that number were Europeans, 34 per cent Asians, 6 Africans and less than 4 per cent North Americans.

#### Explanatory notes

The **statistically recorded population** are those with a fixed abode in Helsinki on the day of reference regardless of their nationality. Foreign nationals are considered to have a fixed abode in Finland if their stay is understood to be or has already lasted for at least a year. Asylum seekers receive a fixed abode only when their applications have been approved. Thus, refugees having been granted political asylum are included in the population of the municipality where they have been received; likewise quota refugees. Staff of embassies, trade missions or consulates and their family members are not included in Helsinki's population unless they are Finnish citizens.

**Country of birth** is the country wherein the mother had permanent residence at the time the child was born. Those born abroad may include Finnish nationals, just as those born in Finland may include foreign nationals.

**Those with a foreign mother tongue** include all who do not speak Finnish, Swedish or Same (the three official languages of Finland) as a mother tongue. The mother tongue is recorded statistically when the parents register the name of the child.

In these statistics, **foreign nationals** are people with a fixed abode in Finland but without Finnish citizenship. The term citizenship defines those who are a citizen, i.e. national, of a country. Usually, citizenship comes with being born in a country, although it can be changed after moving to another country. Some countries allow dual citizenship, which enables people to have two or even more citizenships while retaining their initial citizenship. In the context of this publication, if one of the citizenships is Finnish, the person is recorded as a Finnish citizen. People with more than one citizenship are recorded as citizens of the country whose passport they used when arriving in Finland.

People with a **foreign background** include not only foreign nationals but also Finnish nationals (i.e. Finnish citizens) who have been born abroad. Foreign nationals also include some children born in Finland. Finnish nationals born abroad include both people born abroad in Finnish families and that have later moved back to Finland and people having received Finnish citizenship, i.e. via the process of naturalisation, after moving to Finland.

# Helsinki Region

The Helsinki Metropolitan Area consists of Helsinki, Espoo, Kauniainen and Vantaa.

**The Rest of Helsinki Region** consists of Hyvinkää, Järvenpää, Kerava, Kirkkonummi, Mäntsälä, Nurmijärvi, Sipoo, Pornainen, Tuusula and Vihti.

**The Helsinki Region** consists of the Helsinki Metropolitan Area and the Rest of Helsinki Region.
