Helsinki – as the capital of the country – is the centre of administrative, economic and cultural life in Finland. Helsinki with its neighbouring cities forms a metropolitan area with about 1.3 million inhabitants and more than 50,000 companies. Helsinki is the heart of one of the fastest growing metropolitan areas in the European Union.

Helsinki offers safe and pleasant surroundings in which to live and work, plus a wide range of excellent transport connections. Helsinki is also the centre of expertise of a very high standard where universities and research institutes combine cutting edge competence on an international scale to provide an innovative business environment.

Finland is a member state of the European Union since 1995 and adopted the euro in 1999.

HELSINKI OFFERS:
- A high standard of living
- Exceptional high-tech resources and capabilities
- A well-educated workforce
- Good availability of efficient business services
- Top competitiveness and creativity
- Benefits of the Eurozone membership
- Excellent infrastructure, ideally placed to serve the Russian and Baltic markets
City of Helsinki Annual Report 2007

A Message from the Lord Mayor ........................................ 4
Development in the hands of the City Council ...................... 6
The Mayor’s sector .......................................................... 8
City Planning and Real Estate ......................................... 10
Public Works and Environmental Affairs ......................... 12

Bericht des Oberbürgermeisters ..................................... 24
Rapport du maire de Helsinki ......................................... 25
Обзор мэра города ...................................................... 26
Brief Facts about Helsinki ............................................. 31
The year 2007 was economically good for the City of Helsinki. Tax revenues accrued more than anticipated and the good result of Helsinki Energy contributed to the financing of basic services. The inhabitants were provided with a wide range of services and the urban environment was spruced up.

The annual margin covered depreciation and 85 per cent of the investments. However, it must be noted that in recent years the balance of Helsinki City’s finances has been rather dependent on the good results of the City’s public utility companies. If the City’s economy is examined while excluding the public utility companies, the annual margin only covers 85 per cent of depreciation and less than half of the investments.

The objective is to gradually remove the dependence on the entering of additional income from Helsinki Energy and in that way bring the financing of basic services onto a more sustainable basis. The future prospects for economic development are overshadowed by a growing insecurity in the international economy, which may also influence the development in Finland and the Helsinki Metropolitan Area. In the next few years, the tax base will also be weakened by a scarcity in the workforce supply caused by the aging of the population.

Consequently, various measures have been taken to strengthen the tax base. The aim is to create more jobs in Helsinki by means of an economic and industrial policy that promotes entrepreneurship. The aim in the housing policy is to increase housing production to 5,000 housing units per year. Large areas that become vacant in ports will be planned so that a versatile resident structure is ensured.
The enhancement of Helsinki’s attractiveness is in full swing. Last year Helsinki was at its most vibrant in May, at the time of the Eurovision Song Contest. Our reputation as a good event organiser and an interesting travel destination increased in the eyes of the international audience. The aim is to develop the centre of Helsinki into a scene of events that will attract both residents and tourists all year round. A company named Helsingin Leijona Oy has started reviving the City Hall quarters.

In 2007, concrete results were reached in the cooperation between the Helsinki Metropolitan Area and the 14 municipalities that belong to Helsinki Region. Mutual understanding was reached on an urban-region cooperation plan to be presented to the Government, as well as a programme for the implementation of land use, housing and transport. Länsimetro Oy, Helsinki Metropolia University of Applied Sciences and MetropoliLab – all established in 2007 – show that the Metropolitan Area Cities are able and willing to function for the good of their inhabitants across municipal boundaries.

Jussi Pajunen
Lord Mayor
Development in the hands of the City Council

Under the division of powers between central and local government in Finland, municipalities enjoy autonomy in the administration of many of their affairs. Certain basic tasks are stipulated in the Local Government Act, and in addition to these, municipalities may voluntarily assume others. The only way in which the tasks entrusted to municipalities can be altered is by amending the Local Government Act or by special legislation.

The City Council
The most important decision-making body in Helsinki is the City Council, the 85 members of which are elected by direct popular vote every four years. The City Council elects its own Chair and two Deputy Chairs, the members of the City Board as well as the members of the various committees in proportion to the relative strengths of the various parties represented on it. The other main tasks of the City Council include deliberating budgets and balancing accounts, in addition to setting the general goals to be striven for by the City. The City Council meetings are open to the public and media, if not otherwise decreed by the Council on special occasions.

City Council 2007
85 members representing the following political parties:
- National Coalition (Conservative) 28
- Social Democratic Party 22
- Green League of Finland 16
- Left Wing Alliance 8
- Swedish People’s Party 6
- Centre Party 4
- Christian Democrats 2
- True Finns Party 1
- Communist Party of Finland (Unity) 1

City Board 2007
15 members representing the following political parties:
- National Coalition (Conservative) 5
- Social Democratic Party 4
- Green League of Finland 3
- Left Wing Alliance 1
- Swedish People’s Party 1
- Centre Party 1

26 committees
with 9-13 members each; selected by the City Council
City Board
The City Board is responsible for
• administration and financial management
• preparatory processing of business to be dealt with by the City Council
• implementation of Council decisions
• examining the legality of Council decisions

The fifteen members of the City Board are elected by the City Council for two-year terms and in proportion to the Council’s political composition.

Mayor and Deputy Mayors
The Mayor and the four Deputy Mayors are each responsible for distinct sectors of work and report to the City Board. They follow activities in their respective segments and oversee the implementation of decisions. They are also responsible for preparatory processing of business within their remits and for reporting to the City Board on these matters.

Helsinki Urban Facts
The economic development of Helsinki City and region

According to a preliminary estimate, production in Helsinki Region grew by 4.6 per cent. This figure is about half a percentage point higher than that of the whole country. From the year 2000, production in Helsinki Region had grown by 27 per cent, whereas the increase in the whole country was 24 per cent. It is expected that the economic growth will soon pass the culmination point. Furthermore, the international economic outlook is more insecure than before.

In the last quarter of 2007, the number of those in employment in Helsinki Region grew almost by two per cent as compared to the corresponding period in 2006. The number of unemployed decreased slightly less than in the whole country.

The population in Helsinki Region increased by 14,500 residents, which is almost 900 more than in the previous year. At the end of the year, there were 568,400 people living in Helsinki, which is about 4,000 more than a year before.

Measured by tax revenues and operational achievements, Helsinki had a good year. The tax revenue increased and additional income was entered from Helsinki Energy’s good results for financing the city’s operations.

The City of Helsinki decided to strengthen the tax base in various ways. The aim is to increase the number of jobs by means of an economic and industrial policy that promotes entrepreneurship. The building of 5,000 new housing units per year was proposed as the objective of the housing policy. Helsinki’s attractiveness is to be increased by reviving the City Hall quarters. Helsingin Leijona Oy has been established to administer the facilities.

Structures were developed in the City’s own operations. The supply of electronic services was increased and diversified. The City intensied Group steering, organised training for the leadership of the subsidiary organisations and implemented a Group bank.

Financial development of public utility companies

Helsinki Energy’s turnover was EUR 622.2 million. There was a EUR 9 million increase on the previous year when the influence of the corporatisation of Helsinki Energy’s electrical network operations on the turnover is taken into account. Both the sales of electricity and heat decreased. The tight competition affected the electricity sales. The sales of heat were decreased by the exceptionally warm weather. Profit before appropriations was EUR 262.5 million, which is EUR 61 million higher than the comparable figure for the previous year. In the background of this financial development there are successful operations in the electricity market.

Helsinki Water’s turnover was EUR 99.0 million, which is slightly less than in the previous year. The sales of water to Helsinki decreased by 1.4 per cent. The surplus before reserves was EUR 12.4 million, which is less than the year before. This result was particularly affected by keeping the tariffs the same despite the growth in the cost level.

Cargo traffic through the Port of Helsinki grew into record breaking high volumes. The busy passenger traffic remained at the level of the previous year. The turnover was EUR 95.0 million, i.e. 16 per cent more than the year before. The surplus before reserves was EUR 33 million.

Public utility companies made investments

Helsinki Energy’s investments were EUR 48.4 million, the majority of which concerned the district heating plants and network.

The investments made by Helsinki Water were EUR 35.8 million, which is a significantly higher figure than in the previous years. The investments mostly concerned the water supply network.

The total investments by the Port of Helsinki were EUR 170.9 million. The most significant investment object, EUR 149.4 million, was still the Port of Vuosaari. The building of the port and the planning of its operations progressed favourably.

Regional cooperation and national urban policy

Among the important regional cooperation forums are the Helsinki Metropolitan Area Advisory Board and Coordination Group as well as the Helsinki Region Cooperation Committee.

The proposals for the 14 cooperation projects established for the implementation of the Cooperation Agreement between the Cities in the Helsinki Metropolitan Area were completed.

In a joint meeting, the Metropolitan City Councils approved an urban-region cooperation plan dealing with the local government and service structure reform. This reform contains means by which the
use of services across municipal boundaries is facilitated in the Helsinki Metropolitan Area and by which land use, housing and transport are arranged in Helsinki Region.

The Helsinki Region Cooperation Committee, in which 14 municipalities of Helsinki Region were represented, made preparations for a 2017 programme for implementing land use, housing and transport, and for a letter of intent between the municipalities in the Region and the State for increasing the supply of housing and plots. The municipalities in the Region, together with the State, organised an international ideas competition named the Greater Helsinki Vision 2050.

The Finnish Government started preparations for a metropolitan policy for the special matters pertaining to the Helsinki Metropolitan Area. The aim is to strengthen and extend the letter of intent practices of the State and the Metropolitan Area municipalities as well as partnership cooperation with the different State administrative sectors.

Practical implementation of cooperation
The Cities of Helsinki and Espoo established a joint company to administer, implement and maintain a metro line between Ruoholahti and Matinkylä. Helsinki, Espoo and Vantaa established Helsinki Metropolia University of Applied Sciences and MetropoliLab, which is specialising in research of food, water and environmental samples. The decision on a joint public transport organisation and integrating the water and sewerage systems was shifted to the beginning of 2008.

International activities
Among the pillars of Helsinki’s international operations are coordinated activities, multiculturalism, a regional viewpoint, national partnership, cooperation in the Baltic Sea region, influence in Europe, and global competitiveness and visibility.

Helsinki influenced the development of the innovation policy, joint marketing and infrastructure projects of the Baltic Sea region during her presidency of the Baltic Metropoles (BaltMet) network for the capitals of the region. The Balt-Met Inno Project, led by Helsinki, the starting point of which was the innovation strategy process in Helsinki Region was completed. As a result of this project, the networks of the public sector, higher education institutions and enterprises were strengthened. Additionally, the project led to several concrete development projects that cross organisational boundaries and support the City of Helsinki economic and industrial strategy.

Helsinki and Turku started a challenge campaign in order to improve the state of the Baltic Sea. A new strategy was created for Helsinki-Tallinn Euregio in order to improve the economic, social and cultural cooperation in the Helsinki-Tallinn City twinning. The possibilities for service cooperation between the departments and offices of the Cities of Helsinki and Tallinn were examined. A conference for Nordic capitals and a conference of finance directors held in Helsinki intensified mutual cooperation. Helsinki and Moscow entered into a cooperation agreement for 2007–2010. The Helsinki Days organised in St Petersburg culminated in the meeting of the mayors and a concert given by Helsinki Philharmonic Orchestra.

Communications and urban marketing
As in previous years, regional cooperation was one of the focal areas in communications. The functionality of the City’s popular website was further enhanced.

Among the traditional urban events were the Helsinki Day and a provincial event. The New Year celebration in Senate Square was organised for the second time as a family event.

In 2007 Helsinki was at its most vibrant in May, when hosting the Eurovision Song Contest. The song contest and its social programme increased Helsinki’s publicity as an event organiser and travel destination.

International marketing events were organised in China, St Petersburg and the United States.

KEY FIGURES

Advances in significant component master plans
Construction in the areas that will be vacated from port use in Jätkäsaari and Sompasaari can be started immediately after the new Port of Vuosaari starts operating at the beginning of 2009.

Suburbs as focal points
Distinctive suburbs have a major significance for the vitality and security of Helsinki. The modern architecture in Pihlajamäki was protected with a town plan and the housing companies were given renovation guidelines for buildings. The Herttoniemi allotment garden received a conservation area plan, and a plan including new housing construction was approved for the surroundings of the shopping centre and the metro station. Complementary construction was also planned for Konala, Tapulikaupunki and Myllypuro. The refurbishment of the Jakomäki shopping centre surroundings was planned. The advancement in the Myllypuro shopping centre refurbishment project was ensured.

A boost in town planning
A total of 5,409,86 m² gross of town plan proposals were completed for housing construction and a total of 2,89,575 m² gross of town plan proposals for the construction of offices and other premises. This amount is significantly higher than in 2006. Town planning has focused on large project areas and complementary construction.

Progress in plans for rail projects
Länsimetro, a joint project plan between Helsinki and Espoo, creates a basis for the project decisions, further planning and construction conducted by both City Councils.

Green light to cultural and recreational projects
The heated market situation in the construction field obstructed making a contract agreement for the music hall project. However, construction has progressed on time as subcontracts. The inhabitants’ recreational opportunities are to be improved with a planned extension of the everyman’s golf course in Palohęnä and a spa plan for the Taivallahti shore area, as well as a town plan for the Latokartano sports hall and the Uutela recreational area.

The share of public transport slightly below the target
The share of public transport in morning traffic heading towards the city centre on the border of the cape of Helsinki was 70.4%. Hence the target of over 71% was not quite reached.

Suburbs as focal points
Distinctive suburbs have a major significance for the vitality and security of Helsinki. The modern architecture in Pihlajamäki was protected with a town plan and the housing companies were given renovation guidelines for buildings. The Herttoniemi allotment garden received a conservation area plan, and a plan including new housing construction was approved for the surroundings of the shopping centre and the metro station. Complementary construction was also planned for Konala, Tapulikaupunki and Myllypuro. The refurbishment of the Jakomäki shopping centre surroundings was planned. The advancement in the Myllypuro shopping centre refurbishment project was ensured.

A strengthened regional perspective
The results of the Greater Helsinki Vision 2050 international ideas competition were announced in December. The winner was “Emerald” of WSP Finland. The shared second prize was given to two entries from Germany and one from Finland. A total of EUR 500,000 was awarded in prizes.

A letter of intent was negotiated between Helsinki Region municipalities and the State in order to speed up housing production and the supply of plots.

Land sale and acquisition and ground rents
Land sale revenues amounted to EUR 112 million. EUR 48.6 million was spent on land acquisition. The main object was the areas comprising about 58 hectares in Malminkartano and Hakuninmaa bought from a State company with a pre-emption right.
The ground rent revenues were EUR 165.8 million, of which the share of external rents was EUR 117.7 million. Income from land use agreements totalled EUR 12.7 million.

The housing market looking for a direction
A total of 3,308 housing units was completed, of which 2,881 were new units and 427 extensions to existing buildings and alterations in the use of existing buildings. That is significantly more than in the previous year when fewer than 2,400 units were completed.

In the City’s own production, a total of 807 units were completed but the construction of only 365 units was started. A total of 451 rental housing units were completed, of which 94 were service flats for senior citizens. The production was decreased by the scarcity of plots for rental and right-of-occupancy housing, and by the high contracting prices for owner-occupied dwellings.

The renovation of 942 housing units was started and the repairing of 601 units was completed.

The wooden block of flats built in Omenamäki, Vuosaari, received an honourable mention in Wood Award 2007.

Housing construction slowed down in the last months of 2007 chiefly because of the decreased demand caused by the rise in interest rates and because of the high price level in construction. The prices of low-rise plots increased by about 11 per cent. In 2007 a total of about 2,550 proposals for plot reservations or other prerequisites for housing implementation were recorded.

Building permits sought and granted at a record rate
The number of building permit applications for new construction exceeded 6 million cubic metres for the first time. The corresponding figure for the granted permits was 5,153 million, which is only slightly lower than the 5,63 million cubic metres in the record year 1989. Most of the growth took place in industrial and warehouse construction.

The building permits for blocks of flats contained 16% fewer flats than in the previous year. That is being slightly compensated by the reviving low-rise construction. The one-dwelling and two-dwelling low-rise buildings contained 39% more dwellings than in the previous year.

The Building Regulation Department launched a project scanning microfilmed drawing material. That will allow a gradual shift towards electronic transactions. A home page for the builders of low-rise dwellings was created on the Department’s website.

Construction of premises continued at a record speed
Brisk construction was chiefly due to the building of the Port of Vuosaari. The market was also increased by a need for high-quality office space and the fact that Helsinki remained the preferred area for the real estate investment market. Towards the end of the year, more than 600,000 m² gross of new premises was being constructed.

The City of Helsinki has 2.5 million square metres of built premises in its possession.

A total of EUR 83.6 million was spent on investments in housing construction. It is anticipated that the need for renovation of buildings will increase to EUR 160 million by the year 2010.

New Deputy Mayor
After having led the sector for 16 years, Deputy Mayor Pekka Korpinen retired in October. His work culminated in the preliminary debate on Helsinki’s architectural policy programme conducted by the City Council. In this discussion both the programme and Mr. Korpinen’s life’s work were abundantly acknowledged by the City Council members. Mr. Hannu Penttilä was appointed Mr. Korpinen’s successor.
Public transport in full swing
The World Congress of the International Association of Public Transport (UITP) was held in Helsinki. Helsinki City Transport (HKL) and the Helsinki Metropolitan Area Council (YTV) acted as hosts and received plenty of positive feedback on the congress arrangements. The metro had its 25th anniversary. The jubilee year began with the opening of the Kalasatama metro station on 1 January 2007. The long journey of the Helsinki metro was celebrated, for example, by an exhibition in the Päivälehtti Museum.

A working group that focused on the reorganisation of the Metropolitan Area public transport submitted its report at the end of August. The reaching of a solution on arranging the public transport planning and purchasing activities on a regional basis was shifted and will be made in 2008.

Helsinki City Transport continued preparations for the metro automation and participated in the planning of Länsimetro. The renovation of Itäkeskus metro station was started and the metro bridges were repaired. Rails were constructed for the Kamppi rail line.

Involved in events
Helsinki City Transport, the Public Works Department, Palmia Service Centre and the City of Helsinki Rescue Department participated in the arrangements for the Eurovision Song Contest and other public events with tasks such as cleaning and flagging, as well as safety and security issues. The success of the events raised Helsinki’s reputation as an event organiser and a city with efficient public transport.

The city architect’s post was established 100 years ago. The street laboratory of the Public Works Department celebrated its 70th anniversary. The parking inspectors got new blue uniforms.

The city was spruced up
Littering of public areas was brought under control. People were encouraged towards a responsible use of parks by means of a campaign with the motto „Little things can be big issues“. More deep collection containers and rubbish bins were installed in the parks and the number of complaints about litter decreased.

The Public Works Department continued to coordinate the construction work in the street areas in order to decrease the inconvenience caused. The construction work is also being speeded up with a new pricing for excavating permits.

Kolmikulma Park was completed in the very centre of Helsinki. Kaj Franck street, with its works of art, was opened in Arabianranta. The first trees for the Cherry Park were planted at the base of the Roihuvuori water tower. The stump of the willow tree in Paasikivi Square was moved to be part of the landscape in the Vuosaari hill site.

Besides the construction work on Hakamäentie, the construction of rail line 9 was among the most visible street construction sites. Roundabouts and noise barriers were constructed. Safety rails were built on Vuotie.

Reforms in procurement
An electronic system for the handling of purchase orders was implemented. The aim of this system is to intensify the handling of orders and to produce information on procurement. The procurement reporting and analysis models were developed.

The City Hall’s copying centre was transferred from the Procurement Centre to the Administration Centre and the City’s internal post services are to be handled by Itella Corporation from 1 January 2008 onwards. The digi printing activities at the Kallio office building were discontinued.

The intensifying of the procurement cooperation between the Metropolitan Area Cities was examined and the work will continue in 2008.
Satisfied customers
The turnover of the Palmia Service Centre increased by EUR 6.3 million on the previous year. Safety services had the largest growth. Customer satisfaction improved and the personnel were content with their work.

Furthermore, the satisfaction with the service among the customers of Helsinki Textile Services was further increased. The possibilities for cooperation with the joint authority of the Hospital District of Helsinki and Uusimaa (HUS) were examined.

The design for a new freezing plant for the City of Helsinki Wholesale Food Market as well as the development of retail and wholesale areas were started. The preliminary report on the order management system and logistics project of the enterprises in the area was completed.

Increase in rescue assignments
The number of fire and rescue, emergency ambulance service and emergency medical care calls grew by about 9 per cent from the previous year. Especially the number of structural fires, traffic accidents and ambulance service calls increased. The number of alarm calls increased by about 7 per cent. The Emergency Response Centre caused some false alarms, delays in setting off to emergencies and some increase in the number of emergency medical care assignments. The response time in emergency medical services became longer. However, the surviving percentage of the ventricular fibrillation patients detected by laymen was kept at the level of at least 32 per cent.

In January, the Rescue Department prevented a flood incident that threatened East Helsinki. The situation was facilitated by the thorough flood prevention plans as well as the effective cooperation between the authorities and other actors.

A risk analysis of exceptional circumstances drawn up by the Rescue Department were completed. Merlot Medi, an electronic management and reporting system for emergency medical care, and the Merlot fire inspection programme were taken into use. The Rescue Department obtained new equipment and the Rescue School moved to new premises in Steniusentie.

Reports on environmental issues
The City Board approved a preparedness plan for a sudden increase in airborne impurities. The Climate Strategy for the Helsinki Metropolitan Area up to 2030, prepared by the Helsinki Metropolitan Area Council and the cities of Helsinki, Espoo, Vantaa and Kauniainen was completed. A noise assessment was completed in summer 2007, and measures were taken to draw up an action plan for noise prevention in accordance with the EU Directive on Environmental Noise. The supervision plans for environmental health care were completed. The prohibition of smoking in restaurants significantly increased the number of smoking control tasks.

The Internet-based Helsinki Nature Information System and environmental statistics were opened to the public. Turku and Helsinki committed to improving the state of the Baltic Sea and presented a challenge to the other cities located by the Baltic Sea as well as to businesses and higher education institutions.

The largest scale soil purification work was conducted at the Music Hall plot as well as in the Viikinmäki shooting track area and the Pasilta engineering works area, both to be turned into housing areas.

A decision was made on establishing a joint commercial enterprise named MetropoliLab for the Metropolitan Area. From 1 January 2008 on, the laboratory will produce the research services on the food, water and environmental samples needed by the Metropolitan Area.
Social Affairs and Public Health

Care chain intensified
The care chain of Social Affairs and Public Health was intensified by joint measures conducted by the City of Helsinki departments. The implementation of the Case Manager System made the care chains more flexible. At the same time, the cooperation between the departments was intensified and the customers received a care setting that corresponded to their needs. The penalty fares payable to the Hospital District of Helsinki and Uusimaa (HUS) significantly decreased. In order to support the care chain, 25 acute care beds were bought and 30 new service housing places were established for those long-term hospital patients under 65 years who had queued for a bed in continued care. Additionally, 10 places were bought for mental health rehabilitees. Furthermore, a 30-bed convalescent ward for demented customers was opened in summer 2007.

Focus on the promotion of health and wellbeing
Several projects, such as a Social Affairs and Public Health project named Lapaset Family Network Project, were launched to enhance the health and wellbeing of those Helsinki inhabitants who were in danger of social exclusion. New forms of cooperation, such as a family training model, were implemented in order to support and advance the health of families with small children. The social exclusion of conscription-aged young men was attended to in the Time out! project together with the National Research and Development Centre for Welfare and Health (STAKES) and the Finnish Defence Forces.

A hard autumn in the labour market
The autumn was quite challenging in the labour market. In October, Tehy, the Union of Health and Social Care Professionals, announced that more than 400 members would resign from the Social Affairs and Public Health of the City of Helsinki unless a solution was reached in pay negotiations. As a precautionary measure, the Health Centre, together with the Hospital District of Helsinki and Uusimaa, started operations by means of which it would have safeguarded the emergency medical care for Helsinki inhabitants if the resignations were carried out. A labour market settlement was reached and the resignations did not enter into force.

New management structure in child day care
Five hundred children more than anticipated were tended at the municipal day care centres and private purchased service day care centres. The number of those receiving child home care allowance was further decreased but the number of those receiving private day care allowance grew from the previous year.

The new management structure for the day care units was introduced at the beginning of August. In this new management structure, the sizes of the day care units were made uniform and their management became a separate professional task. The training for supporting this change has been started. As regards to a customer questionnaire on applying for a day care place and starting in day care, the parents estimated the quality of information provision and customer service as very good.

From August onwards, families moving from one city to another within the Metropolitan Area were given a chance to keep their child’s current day care place until the child started school.

Changes in the Child Welfare Act and in child psychiatric care
The City Council decided to shift the care responsibility for child psychiatric care from family counselling offices to the Hospital District of Helsinki and Uusimaa from the beginning of 2008 onwards. It was determined that the task of the family counselling offices was to provide counselling in upbringing and family matters in accordance with the Child Welfare Act. The City Council also decided to shift the care responsibility for child psychiatric care from family counselling offices to the Hospital District of Helsinki and Uusimaa from the beginning of 2008 onwards. It was determined that the task of the family counselling offices was to provide counselling in upbringing and family matters in accordance with the Child Welfare Act.
ance with the Social Welfare Act and that the cus-
tomers were children aged 0–17 years and their
families. Previously, the age limit was 13 years. As
the resources of the family counselling offices re-
main the same, this change means, in practice, a
significant focus on early support and youth.

In child welfare, preparations were made due
to the new Child Welfare Act by organising train-
ing for the personnel, renewing instructions and
developing customer information systems. The
family centres strengthened the working forms
early support.

Decrease in need for social assistance
The employment situation continued to be good
and the number of people receiving social as-
sistance decreased by 1,448 (2.8%) from the pre-
vious year. On the average, it took less than 7
days to receive a decision on the granting of so-
cial assistance. The need for social assistance was
reduced by intensifying the initial assessment
of new customers and customer guidance, ac-
tivation of those under 25 years of age and em-
ployment measures, as well as financial and debt
counselling. A total of nearly 5,000 people (4,500
in 2006) were involved in the employment ser-
tices of the Social Services Department.

A substance abuse service project that utili-
ises community methods was launched in Mylly-
puro. The planning of the project on individual
housing for people with mental and developmen-
tal disabilities was started. Housing counselling
activities were organised in six of the City’s real
city estates.

Smoke-free Helsinki
The life style changes of Helsinki inhabitants are
supported with the Smoke-free Helsinki pro-
gramme (2007–2015). The City of Helsinki was
declared to be smoke-free from the beginning of
2007 onwards. That was a substantial decision for
the creation of a healthier environment for Hel-
sinki inhabitants. A smoking cessation clinic was
established in connection with the Kallio Health
Station, where inhabitants received group or per-
sonal guidance in order to stop smoking.

Launch of the Healthy Helsinki Programme
With the Mayor’s decision, the Healthy Helsinki
Programme (2007–2010) was started. Besides
the Health Centre, the central actors in this pro-
gramme are the Social Services Department and
the Education Department. A real-life test envi-
ronment (Living Lab) was created, with the aim
to develop service channels that improve service
availability, as well as solutions that would help the
inhabitants take more responsibility for maintain-
ing and promoting their own health. The central
idea in this development work is wide cooperation
between the inhabitants and the different city ad-
inistrations, the business sector and NGO’s.

Electronic services in dental
care and at clinics
Electronic services were tested in dental care and
at two maternity and child health clinics. This
test is part of a larger electronic services project
of the City of Helsinki. The City intends to in-
crease the amount of online services in its basic
services, and, in this respect, the test conducted
by the Health Centre was pioneering. The aim is
to provide the customers with a service that is not
dependent on time and place, and to free health
care personnel resources for nursing.

The queue for dental care was cleared
The queue for non-emergency dental care was
cleared by means of a service voucher, purchased
services in dental care, a hired workforce and the
queue clearing efforts taken by the personnel.
Dental services also offered its customers an op-
portunity for electronic communication and re-
mined its customers of their appointments by
means of SMS messages.
The number of comprehensive school pupils in decline

The number of pupils attending comprehensive school decreased by almost 1,100 from the previous year. At the same time, the number of pupils with special needs and pupils from an immigrant background grew. Moreover, the number of pupils attending afternoon activities grew by more than 300.

In basic education, the number of lessons for classes 1–6 was increased to the level preceding the savings decisions, which decreased the average size of the study groups.

The Education Department made preparations for the development of the network for the comprehensive schools and upper secondary schools. This work was based on age group forecasts drawn up by the City of Helsinki Urban Facts and the set aims and constraints. The City Council decided to merge eight schools in 2009 and 2010.

The Ministry of Education granted 280 additional vocational education places to the City of Helsinki.

A decision was reached to combine the Helsinki Polytechnic Stadia and EVTEK University of Applied Sciences into a limited-company-based Helsinki Metropolia University of Applied Sciences.

The Finnish and Swedish Adult Education Centres of Helsinki also worked in close cooperation at the metropolitan level. The Finnish Adult Education Centre is still the largest liberal adult education institution in Europe.

Information available

The number of virtual visits to the Helsinki City Library exceeded the number of customer visits to the library for the first time. The particular development object of the library was the adoption of an interactive customer service culture.

The Helsinki Metropolitan Area Libraries (HelMet) obtained a joint procurement system for library material.

Among the most significant products of the City of Helsinki Urban Facts were a new City of Helsinki research programme named “Helsinki tutkii 2007–2009”; the City of Helsinki statistical yearbook 100 years jubilee edition; a broad statistical comparison of the six major cities in Finland; an operating environment analysis named Helsinki – State and Development drawn up for use at an evaluation seminar held by the City Council; a population and service needs analysis of the Metropolitan Area for 2015 and 2025; and the completion of the Urban Programme for the Helsinki Metropolitan Area 2005–2007.

The organisation of the cultural office was renewed at the beginning of 2007. There are currently three divisions: cultural policy, cultural services and joint services.

In 2007 the exhibitions at the Helsinki City Art Museum attracted more than 180,000 visitors and the number of visitors to the Helsinki City Museum also grew vigorously.

In its 125th jubilee season, the Helsinki Philharmonic Orchestra received wide publicity in Finland and abroad. The orchestra received the Disc of the Year title in Finland and a prestigious international disc award in Great Britain. A successful tour was made in Austria and Germany in spring 2007. The orchestra performed at the premises of the St Petersburg Philharmonic Orchestra in November. In the early part of the autumn season, the orchestra played all Sibelius’ symphonies and organised concerts for thousands of its ‘godchildren’ as a festive completion of the 7-year-long godchild project.

International cultural year

The City of Helsinki Cultural Office was responsible for the versatile city events in connection with the Eurovision Song Contest. In the spirit of the Eurovision songs, the Ourvision singing contest was created by the International Cultural Centre Caisa. A Chinese New Year event, held for the first time in February 2007, was a success with about 25,000 visitors.

The organisation of the cultural office was renewed at the beginning of 2007. There are currently three divisions: cultural policy, cultural services and joint services.

In 2007 the exhibitions at the Helsinki City Art Museum attracted more than 180,000 visitors and the number of visitors to the Helsinki City Museum also grew vigorously.

The number of virtual visits to the Helsinki City Library exceeded the number of customer visits to the library for the first time. The particular development object of the library was the adoption of an interactive customer service culture.

The Helsinki Metropolitan Area Libraries (HelMet) obtained a joint procurement system for library material.

Among the most significant products of the City of Helsinki Urban Facts were a new City of Helsinki research programme named “Helsinki tutkii 2007–2009”; the City of Helsinki statistical yearbook 100 years jubilee edition; a broad statistical comparison of the six major cities in Finland; an operating environment analysis named Helsinki – State and Development drawn up for use at an evaluation seminar held by the City Council; a population and service needs analysis of the Metropolitan Area for 2015 and 2025; and the completion of the Urban Programme for the Helsinki Metropolitan Area 2005–2007.
City Archives gave support to various branches of administration in the electronic formation of archives, electronic archiving and document management.

The Internet utilised in youth work
The Youth Department used media and the web in a versatile way in youth work. Netari.fi, a youth house project on the Internet, was extended nationwide with 13 participating municipalities. The theme of the opening days in the autumn was media and the utilisation of the Internet. A three-year cooperation agreement was made with the Ministry of Education on a national development project for network-based youth work.

The Youth Department started implementing the operational and premises strategy drawn up for 2007–2012. The northeastern major district was the first object of the analysis that was conducted on the service network and service capacity. The youth and other inhabitants in the northeastern major district were consulted in three events.

Versatile sports for people of all ages
The local sports facilities completed in Lauttasaari Sports Park offer children and youth an opportunity for over twenty different sports. The project was implemented in cooperation with the Cultural Department and the Public Works Department.

To celebrate the theme year of health-promoting sports, a special day for health-promoting sports was organised at Liikuntamyly Sports Hall, where the participants were able to try different sports and familiarise themselves with sports guidance.

The year 2007 was also a Vire-X theme year, which emphasised the importance of wellbeing at work. The major individual event dealing with wellbeing at work attracted 4,500 City employees to Töölö Sports Hall.

Helsinki Ice Park in Railway Station Square received an Unelmien Helsinki award (“a Helsinki of Dreams award”) and a Best of Helsinki award. The grounds for receiving these awards were that the artificial ice skating rink had made Helsinki a better and more fun place to live in.

Happy family occasions at Helsinki Zoo
The year 2007 was the 118th operational year of Helsinki Zoo and the number of visitors was more than half a million. The renovation and extension project of Pukki Restaurant, which dates from 1884, was launched in September. The building will be taken into use again in May 2008.

Some species that are rare in wildlife obtained progeny at Helsinki Zoo. Among these were a hyacinth macaw, two Amur leopards, three wolverines, seven manuls, one takini and two Przewalski wild horses.

Recruiting across municipal boundaries
The aim of the projects dealing with the City’s personnel strategy was to safeguard adequacy of personnel resources, to develop know-how and work equipment, to promote rewarding and innovation, and to improve the management of change. The first City-level recruiting plan was drawn up together with the departments and the public utility companies. All Metropolitan Area Cities participated in the implementation.

In its first operational year, the work conducted by the Immigration Division focused on defining the role, goals and tasks of the division, and providing information thereon, as well as on starting the work for drawing up an immigration policy programme.

The personnel’s work capacity is supported
The Occupational Health Centre intensified the examination of work ability problems and the rehabilitation measures by establishing a special rehabilitation group. In addition to the early-stage support for maintaining work ability, a support model was developed for those returning to work from a long sick leave.
The result for the City of Helsinki in the financial year 2007 indicated EUR 363.0 million and the surplus after adjustments to reserves and funds was EUR 257.8 million. The surplus was chiefly due to the tax revenues, which were EUR 123.0 million higher than the budget estimate, and a EUR 217.6 million surplus from Helsinki Energy.

The annual margin of EUR 544.8 million covered depreciation (EUR 294.2 million) and 84 per cent of the investments (EUR 648.6 million). The annual margin per inhabitant was EUR 938. In the past five years the annual margin per inhabitant has varied from EUR 587 to EUR 958.

The situation looks different if the City’s economy is examined without the public utility companies. Excluding the public utilities, the annual margin was EUR 167.2 million, depreciation EUR 197.8 million and the original acquisition costs of investments EUR 347.9 million. In other words, the annual margin excluding public utility companies only covered 85 per cent of depreciation and 48 per cent of the investments.

The annual margin excluding public utility companies was EUR 194 / inhabitant. This annual margin has grown in the past five years from EUR 87 / inhabitant in 2003 to EUR 294 / inhabitant in 2007.

### Calculation formulae for indicators for the financial statements 2007

#### Indicators for the profit and loss statement

**Share (%) of operating revenue from operating expenses**

\[
\text{Share} = \frac{\text{Operating revenue}}{\text{Operating expenses}} \times 100
\]

**Annual margin, million euros**

\[
\text{Annual margin} = \text{Operating revenue} - \text{Operating expenses} - \text{Depreciation}
\]

**Share of annual margin from depreciation, %**

\[
\text{Share} = \frac{\text{Depreciation}}{\text{Annual margin}} \times 100
\]

**Annual margin, euros/inhabitant**

\[
\text{Annual margin/inhabitant} = \frac{\text{Annual margin}}{\text{Number of inhabitants}}
\]

**Annual margin excl. public utility companies, euros/inhabitant**

\[
\text{Annual margin/inhabitant} = \frac{\text{Annual margin}}{\text{Number of inhabitants}}
\]

**Number of inhabitants**

2007: 568,400
2006: 564,521

#### Indicators for the funds statement

**Internal financing of investments, %**

\[
\text{Internal financing of investments} = \frac{\text{Annual margin}}{\text{Original acquisition costs of investments}} \times 100
\]

**Internal financing of capital expenditure, %**

\[
\text{Internal financing of capital expenditure} = \frac{\text{Annual margin}}{\text{Original acquisition costs of investments} + \text{Net increase in lending} + \text{Loan amortisations}} \times 100
\]

**Debt servicing margin**

\[
\text{Debt servicing margin} = \frac{\text{Annual margin} + \text{Interest expenses}}{\text{Interest revenue} + \text{Loan amortisations}}
\]

**Cash 31 December, 1,000 euros**

2007: 780,553
2006: 728,069

**Cash sufficiency, days**

\[
\text{Cash sufficiency, days} = \frac{365 \times \text{Cash 31 December}}{\text{Cash payments in the financial year}}
\]

#### Indicators for the balance sheet

**Gearing ratio, %**

\[
\text{Gearing ratio} = \frac{\text{Capital} + \text{Depreciation difference and voluntary reserves} - \text{Advances received}}{\text{Balance sheet total} - \text{Advances received}} \times 100
\]

**Relative indebtedness, %**

\[
\text{Relative indebtedness} = \frac{\text{Liabilities} - \text{Advances received}}{\text{Revenue}} \times 100
\]

**Debt-to-equity ratio**

\[
\text{Debt-to-equity ratio} = \frac{\text{Liabilities} - \text{Advances received}}{\text{Capital}}
\]

**Loan portfolio, 31 December, million euros**

2007: 718
2006: 680

**Loans, euros/inhabitant**

2007: 1,263
2006: 1,205

**Loan receivables, 31 December, million euros**

2007: 1,021
2006: 976

The amount of loan per inhabitant is calculated by dividing the above-mentioned loan portfolio by the number of inhabitants in a municipality on the last day of the financial statements year.

**Loan receivables, 31 December**

\[
\text{Loan receivables} = \frac{\text{Bond receivables} + \text{Other loan receivables entered as investments}}{\text{Number of inhabitants}}
\]
According to the 2007 financial statements estimates, the average annual margin of the municipalities in mainland Finland was EUR 368 / inhabitant and covered 131 per cent of depreciation.

The comparison of the 2007 profit and loss statement with the previous year is complicated by the corporatisation of the electrical network operations of Helsinki Energy into a separate limited company on October 1, 2006. The figures for 2006 include the electrical network operations from January 1 to September 30, 2006, which can be seen particularly when comparing the operating revenue and the operating expenses with the previous year.

The City’s operating revenue decreased by one percentage unit from the previous year, whereas the operating expenses grew by 3.5 per cent. The operating revenue excluding public utility companies increased by 2.1 per cent and the operating expenses by 5.3 per cent. In the past five years the share of operating revenue from operating expenses has remained at the same level, varying from 41.5 per cent to 44.9 per cent.

In 2007, a total of EUR 117.0 million was entered as incidental income, chiefly sales profits from fixed and long-term assets. A total of EUR 74.4 million was transferred to funds from the EUR 363 million profit for the financial year. The most significant transfer was EUR 47 million to the Kamppi-Töölönlahti Area Investment Fund. EUR 17.5 million was entered as income from funds. Additionally, an increase in the investment reserves reduced the profit by EUR 48.4 million, of which the Port of Helsinki share was EUR 33 million. In that way, the surplus for the financial year was EUR 257.8 million. The surplus for the financial year includes the public utility companies’ surpluses, i.e.: Helsinki Energy EUR 217.6 million, Helsinki Water EUR 2.9 million, Palmia Service Centre of the City of Helsinki EUR 3.3 million and Helsinki Textile Services EUR 11,642. The Port of Helsinki and Helsinki City Transport reported a zero result.

At year-end the cash assets were EUR 52.5 million higher than at the beginning of the year.

The cash received was EUR 5,027.9 million and cash paid EUR 4,916.6 million. At year-end the cash sufficiency was 67 days. In other words, the cash could cover the cash payments for 67 days. In the past five years, cash sufficiency has varied from 57 days to 67 days, which indicates that the City’s liquidity has remained good throughout the whole period.
In recent years, the indicator for internal financing of investments has grown steadily from 69.8 per cent in 2003 to 85.3 per cent in 2007. This indicator tells about the sufficiency of the annual margin for the original acquisition costs of investments.

In 2007 the debt servicing margin was 4.4. This indicates the sufficiency of cash-flow financing for the payment of interests and amortisations on liabilities. The municipality’s debt servicing capacity is considered good if the indicator rate exceeds 2. In the past five years, the City’s debt servicing margin has remained over 2.

On December 31, 2007 the balance sheet total was EUR 10,212.3 million. There was a EUR 428.1 million growth from the previous year. On the Assets side, the largest increase was EUR 194.3 million at the point of advance payments and construction in progress, which was due to the investments in progress in the Port of Vuosaari. By means of land acquisitions, there was an increase of EUR 81.2 million in the balance sheet value of land and water areas. On the Liabilities side of the balance sheet, the largest increases were EUR 311.2 million in capital due to the surplus for the financial year, as well as EUR 75.2 million in long-term liabilities due to loans taken by the Port of Helsinki.

The repayments on borrowings totalled EUR 93.9 million. A new loan of EUR 130 million was taken by the Port of Helsinki for the investments to be made in the Port of Vuosaari. Relative indebtedness, which indicates what percentage would be needed from a municipality’s revenue in order to pay back the liabilities was 35.3 per cent. In the past five years, the value of the relative indebtedness indicator has varied from 34.1 per cent to 39.6 per cent. At year-end the loan portfolio was EUR 718 million, i.e. EUR 1,263 / inhabitant.

The gearing ratio, which measures a municipality’s solidity was 76.9 per cent. In the past five years, the gearing ratio has varied from 74.7 per cent to 76.9 per cent. An average of 70 per cent solvency is considered a good target level for municipal finances.

The aim is to create a situation in the medium term where the funding for basic services is on a more stable ground than today, and the service level is not dependent on the entering of additional income from business operations, chiefly from Helsinki Energy. In this target situation, the budgeted annual margin of actual operations covers depreciation, whereas the annual margin for 2007 only covered 85 per cent of depreciation.

Because of the positive economic development in 2007, the significantly improved employment situation and the tax revenue development that was more positive than in previous years, followed by a peak in the national economic cycle, the City’s finances can be balanced on a long term basis. It is important to bring the finances into balance as the future economic development is overshadowed by the growing insecurity in the international economy and its possible reflections on the development in Finland and the Helsinki Metropolitan Area, as well as by the influence of the ageing population on the workforce supply and the tax base.
The City Board proposes to the City Council that the profit of EUR 363,027,081.73 before reserve and fund entries be dealt with as follows:

In accordance with the proposal by the Technical Committee, the Helsinki Energy surplus of EUR 217,563,608.88 be transferred to the Helsinki Energy balance sheet as capital.

In accordance with the proposal by the Technical Committee, the Helsinki Water surplus of EUR 2,861,047.88 be transferred to the Helsinki Water balance sheet as capital.

The Port of Helsinki surplus/deficit for the financial year amounts to EUR 0.00.

The Helsinki City Transport surplus/deficit for the financial year amounts to EUR 0.00.

In accordance with the proposal by the Commercial Services Committee, the Helsinki Textile Services surplus of EUR 11,642.65 be transferred to the Helsinki Textile Services balance sheet as capital.

In accordance with the proposal by the Commercial Services Committee, the Palmia Service Centre surplus of EUR 3,276,242.71 be transferred to the Palmia Service Centre balance sheet as capital.

The Housing Loan Fund surplus of EUR 1,504,174.88, the Housing Production Fund surplus of EUR 22,733,795.23, the Sports and Recreation Fund surplus of EUR 884,618.27, the Insurance Fund surplus of EUR 2,178,043.80 and the Innovation Fund deficit of EUR 3,575,968.69 be transferred to the balance sheet of the appropriate fund as capital in accordance with the regulations of the funds concerned.

The City Board also proposes that the results for the financial period from other operations be dealt with as follows:

An amount of EUR 5,204,928.34, which is equivalent to the expenditure on investment in the Kamppi-Töölönlahti area, be entered as income from the Kamppi-Töölönlahti Area Investment Fund in accordance with the regulations of the fund. The land sales income of EUR 46,961,007 from the Kamppi-Töölönlahti area be transferred to the Kamppi-Töölönlahti Area Investment Fund.

An amount of EUR 8,651,109.84, equivalent to the actual expenditure, be entered as income from the Suburban Fund.

As proposed by the Housing Production Commission, an amount of EUR 29,000 be transferred from the profit of the Housing Production Department for the financial year to the Housing Production Fund.

The depreciation difference of EUR 840,939.63 resulting from the investment reserve for the City office building in Kallio be entered as income.

It is proposed that the surplus of EUR 14,082,485.05 for other operations after reserve and fund entries be entered under Helsinki City capital as surplus/deficit from previous financial years.

Additionally, the City Board proposes to the City Council that EUR 200,000,000 from the retained earnings of the Helsinki Energy balance sheet be entered under Helsinki City capital as surplus/deficit from previous financial years in accordance with the proposal by the Technical Committee.

</table>
Im Jahr 2007 konnte die Stadt Helsinki eine positive wirtschaftliche Entwicklung verzeichnen. Die Steuereinnahmen lagen über den budgetierten Summen, und zur Finanzierung der Grundversorgung trug auch das gute Ergebnis der Helsinki Energie bei. Es konnte ein vielfältiges kommunales Dienstleistungsangebot gewährleistet und das Stadtbild weiter entwickelt werden.

Die Jahresdeckung reichte zur Abdeckung der gesamten Abschreibungen sowie von 85 Prozent der Investitionen aus. Es muss dennoch berücksichtigt werden, dass das Wirtschaftsgleichgewicht in Helsinki in den vergangenen Jahren von einem guten Ergebnis der städtischen Unternehmen abhängig gewesen ist. Berücksichtigt man also bei der Betrachtung des Haushalts die städtischen Unternehmen, deckt die Jahresdeckung nur 85 Prozent der Abschreibungen und weniger als die Hälfte der Investitionen ab.

Ziel ist, die Abhängigkeit vom Jahresüberschuss der Helsinki Energi nach und nach aufzulösen, um eine stabilere Finanzierungsgrundlage für die Grundversorgung zu schaffen. Die Zukunftsperspektiven der Wirtschaftsentwicklung werden von der zunehmenden Unsicherheit der internationalen Wirtschaft überschattet, die sich auch auf die Entwicklung in Finnland und der Hauptstadtregion auswirken könnte. Die Steuerbasis der kommenden Jahre wird zusätzlich von dem durch die Bevölkerungsalterung verursachten Arbeitskräftemangel geschwächt.

Rapport du maire de Helsinki

Du point de vue financier, l’année 2007 a été bonne pour la ville de Helsinki. Les recettes fiscales ont surpassé les estimations et le bon résultat de la société Helsingin Energia a aidé pour sa part au financement des services de base. Il a été ainsi possible d’offrir des services variés aux habitants et d’améliorer l’environnement de la ville.

La marge annuelle a permis de couvrir les amortissements ainsi que 85 % des investissements. Cependant, il ne faut pas oublier que l’équilibre économique de Helsinki de ces dernières années a été très dépendant du bon résultat des entreprises de service public. En considérant l’économie de la ville sans les entreprises de service public, la marge annuelle n’aurait permis de couvrir que 85 pour cent des amortissements et moins de la moitié des investissements.

L’objectif est de se libérer progressivement de cette dépendance aux résultats excédentaires de Helsingin Energia et d’obtenir ainsi un financement des services de base sur un fond plus durable. L’incertitude croissante de l’économie internationale, qui peut avoir aussi un impact sur le développement de la Finlande et des environs de la capitale, assombrit les perspectives d’avenir du développement économique. La pénurie de main-d’œuvre causée par le vieillissement de la population affaiblira également la base fiscale des prochaines années à venir.

Nous avons d’ailleurs déjà pris des mesures d’actions diverses pour renforcer cette base fiscale. Nous essayons par une politique d’activités économiques favorable aux entreprises d’augmenter le nombre d’emplois à Helsinki. L’objectif de la politique du logement est d’augmenter la construction de logements à 5000 unités par an. Les projets relatifs aux grandes surfaces libérées de zones portuaires visent à assurer une structure de population variée.

Quant au développement de l’attraction de la ville de Helsinki, nous sommes dans la bonne voie. La ville était à son plus animé l’année dernière en mai lors du concours Eurovision de la chanson. Notre réputation en tant que bon organisateur d’événements et de destination touristique intéressante a grandis aux yeux du public international. Le but est de développer, en particulier dans le centre de Helsinki, une scène d’événements attirant tout autant les citoyens de la ville que les touristes tout au long de l’année. L’animation des pâtes de maisons entourant la mairie est déjà en cours grâce à l’efficacité de la société Helsingin Leijona Oy.

Jussi Pajunen
Maire de la ville de Helsinki

2007 год стал для города Хельсинки хорошим с экономической стороны. Доходов от налогов было получено больше ожидаемого, а хорошие результаты работы Helsingin Energia помогли финансировать оказание основных услуг населению. Жителям города стали предлагать разные новые услуги и было улучшено состояние городской среды.

Годовой доход полностью скомпенсировал амортизацию и покрыл 85% от инвестиций. При этом надо учитывать, что экономическое равновесие г. Хельсинки в течение последнего года было в сильной зависимости от хороших результатов деятельности торговых предприятий. Если рассматривать экономику города без учета деятельности торговых предприятий, то годовой доход позволял бы покрыть только 93% амортизации и менее половины инвестиций.

Мы стремимся постепенно уменьшить зависимость от неординарных результатов деятельности Helsingin Energia и таким образом перевести финансирование основных услуг на более стабильную основу, чем сейчас. Будущее экономического развития осложняется растущей дестабилизацией международной экономики, что может также осложнить развитие Финляндии и ее столичного района. Количество облагаемых налогов объектов будет также снизиться из-за грозящего в результате старения населения снижения количества рабочей силы.

Уже были предприняты некоторые меры для увеличения количества облагаемых налогов объектов. В Хельсинки стремятся к увеличению числа рабочих мест при помощи способствующей предпринимательской деятельности политики. Жилищно-политической мерой является увеличение строительной площади до 5000 квартал за год. Обновляемые большие портовые территории преобразуются для проведения там разнообразного жилищного строительства.

Много делается и для того, чтобы сделать город Хельсинки более притягательным. В течение прошлого года оно большое оживление в Хельсинки наблюдалось в мае, во время проведения там конкурса песни Евровидения. В глазах международного общества росла слава Хельсинки как умелого организатора мероприятия и в качестве интересной цели путешествия. Была поставлена цель превратить Хельсинки, особенно центр его, в арену, где в течение всего года происходят события, притягивающие внимание как гостей, так и приезжих. Силами созданного акционерного общества Helsingin Leijona OY "Юсси Паюнен"

Мэр города Хельсинки начало уменьшить количество облагаемых налогов объектов.
