# ALL-in CityApp -portal: A short manual guide

**We have presented a username for you for the access to The ALL-in CityApp –portal for Helsinki City Center vitality database.**

username: allin@helsinki.fi

password: rethinking2023

Link to the database: <https://app.allincityapp.com/>

## **Tips for searching data:**

1. You have to load the mapping round (year). (The last update has done in April 2023.) Choose also the language (in right up corner).

2. You can delimit the shown data by selecting categories (main category, industry, location). Notice, that all earlier selection will delimit the data, since they are undo. All selection made will delimit the data on map, statistics and in the list of premices as well.

3. The List of premices can be sort by the categories or industry (main categories in alphabetical order, indutries by running number).

4. The website addresses in the list are online shop addresses (not updated in 2023).

Notice: In pandemic years (2020-2022) contemporarily closed retailes and servises were updated as "frozen". Those can be shown by choice: Show frozen only /also

## Premices classification in ALL-in database

- **RETAIL STORES** Businesses serving walk-in customers also on Saturdays
- **RESTAURANTS** Restaurants and cafès serving customers also on Saturdays
- **SHOPS** Stores / offices that DO NOT serve walk-in customers on Saturdays
- **EMPTY PREMICES** Empty premices – potential for retail / services
- **RENOVATION / SEASON** Premices under renovation / in seasonal use only / pop-up
- **LARGE RETAIL** Large retail units (1000-4000 m<sup>2</sup> / < 4000 m<sup>2</sup>).
- **SPACE REQUIRING** Space requiring retail units\*

\*Space requiring retail units are by industry: hardware, vehicles and spare parts, furniture and garden supplies. (Definition by Ministry of Environment in Finland). Spacious retail units are usually located outside the city center zone.
