

Criteria for low-emission vehicles until 31 December 2024

- The CO₂ emissions of low-emission cars and vans (incl. hybrids) may not exceed 50 g/km in WLTP tests and 37 g/km in NEDC tests, and they must meet at least the criteria of the Euro 6 standard.
- To meet the CO₂ emissions criteria, it is sufficient that a vehicle's emissions value meets the above-mentioned limits in at least one of the emissions tests.
- All all-electric L-category vehicles (motorcycles, mopeds, three and four-wheeled scooters and motorised quadricycles) are low-emission vehicles.

[Criteria for low-emission vehicles as of 1 January 2025](#)
